

TOSCA Certified Administrator is the recommended training for executive TOSCA Testsuite™ users with administration tasks. Participants set up a multiuser environment, take on the role of the administrator and learn about the methods and functions required to administrate audit-proof TOSCA Commander™ projects. The training course is completed by the TOSCA Certified Administrator certification exam.

Install TOSCA Testsuite™ successfully

TOSCA Testsuite™: This part of the training covers the installation and basic configuration of TOSCA Testsuite™, as well as setting up license management.

The optimal procedure for updating your TOSCA Testsuite™ version is discussed as well.

Adapt TOSCA Testsuite™ to your project requirements

TOSCA Testsuite™, TOSCA Commander™, TOSCA Wizard: Key topic is the customer-specific configuration of TOSCA Wizard and TOSCA Commander™.

Execute unattended tests

TOSCA Testsuite™

Large-scale, automated test portfolios use a unattended execution.

These and many more requirements are met by applying the shell scripting language TC-Shell.

Gain total control over complex projects

TOSCA Testsuite™, TOSCA Commander™:

Participants learn how to set up project-specific user management, assign role-based user rights, extend objects by project-specific properties and how to administrate multiple versions of objects.

Participants gain a detailed insight into virtual folders for the administration of project statuses, into the TOSCA Query Language (TQL), the meta settings and settings concept as well as into backup & restore concepts.

Objective

- TOSCA Certified Administrator Certificate
- Comprehensive know-how on various possibilities in deploying and operating TOSCA Testsuite™ on the administrator level
- Thorough theoretical and practical knowledge on the role and authorization concept of TOSCA Testsuite™
- Detailed information how to get the most out of TOSCA's version management

Benefits

Participants learn, in theory and in practice, how to adapt TOSCA Testsuite™ to company and project-specific requirements. The main focus is on the initial configuration of TOSCA Testsuite™.

Participants take on the role of administrator and user in a simulated multiuser environment. Many detailed and practical exercises illustrate the role and authorization concept, as well as the administration of TOSCA repositories via virtual folders and TQL.

Participants are introduced to the nuts and bolts of audit-proof test project management and learn how to implement the required standards based on typical testing tasks. The many practical tips our trainers bring from their broad project experiences represent exceptional added value.

After completing the training course, administrators are in full control of test projects.

The package includes

- Instruction by a trainer with functional know-how from a variety of customer projects
- Functional training with hands-on examples and exercises
- Comprehensive training material

Methodology

Presentation, demonstration, practical exercises

Time frame

The Training TOSCA Certified Administrator lasts for two days.

Dates

The training course is set up by appointment. In addition, public training courses are held once per quarter.

Maximum number of participants

Four participants

Any questions?

Please do not hesitate to contact us by training@tricentis.com for further details or price quotes.

Prerequisite

- TRICENTIS recommends a completed and valid TOSCA Certified User Foundation Level certificate

Target audience

- TOSCA Testsuite™ administrators (test manager, test administrator)
- TOSCA Testsuite™ users with technical background (test automation developers)

Infrastructure

The general requirements for the TOSCA Testsuite™ training courses apply, which we have summarized for you in the „TOSCA Testsuite™ Training Courses“ flyer. The training course is held in a multi-user system, as is common in production environments.

Participants therefore require write access to a common network drive.

Certificate

The TOSCA Certified Administrator certificate is valid for two years after successfully completing the exam.
