

With comprehensive know-how covering all sectors of the industry, TRICENTIS Technology & Consulting GmbH serves its customers both nationally and internationally in all fields related to software testing and software quality assurance.

Company

Since establishing the company in 1997, we have focused on safeguarding our customers' automated business processes by ensuring a software test that is methodologically sound and maximally automated.

Our customers can always rely on the extensive knowledge and the vast experience of our highly competent team. We provide solutions throughout the complete lifecycle of a project:

- Methodology, conceptual design and project coordination
- TOSCA Testsuite™ – the integrated test management and test automation suite
- Training and consulting

With over 300 satisfied TRICENTIS customers, our consultants successfully prove their outstanding expertise and the capability of the TOSCA Testsuite™ every day.

Services

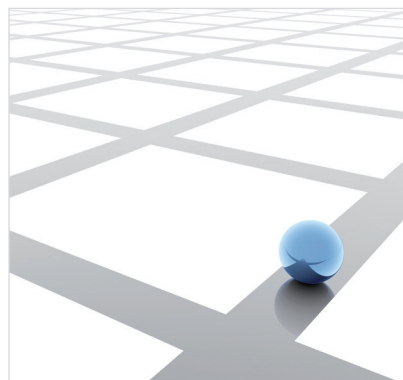

TRICENTIS provides excellent consulting and services in all areas related to software quality assurance.

TOSCA Testsuite™:

- Training and certification, workshops
- Custom-tailored implementation of TOSCA Testsuite™
- Integration into existing infrastructures
- Test center setup and maintenance

Methodology, conceptual design and coordination:

- Test planning
- Test case evaluation and specification
- Test automation
- Test coordination and test management

Facts

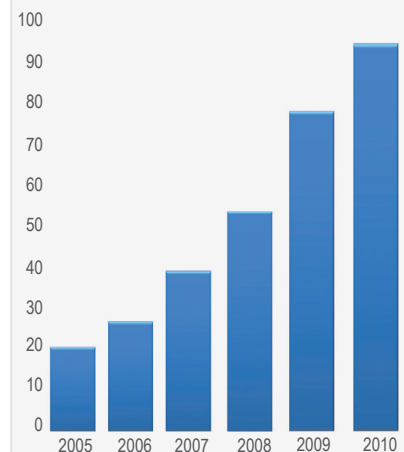

Established in
1997

CEOs:
Wolfgang Platz
Franz Fuchsberger

Offices:
AT: Vienna (head office)
DE: Hamburg
CH: Zurich
UK: London
NL: Amsterdam
AU: Sydney (Headquarters Asia Pacific)
US: Greater New York Area (Headquarters US) Reno/Nevada, Dallas/Texas, Detroit/Michigan

Projects in:
Austria, Germany, Switzerland, Hungary, Romania, Serbia, Croatia, Netherlands, Slovakia, Singapore, India, Poland, the United Kingdom, Australia, New Zealand and the United States of America.

Number of Employees

Customers by Industry

Finance:	German Stock Exchange, Raiffeisen Capital Management, INFO AG, Julius Bär
Insurance:	Swiss Re, Generali Deutschland, Allianz, Vienna Insurance Group, HUK-Coburg, Skandia
High Tech:	A1 Telekom, GlobeFuel, DVAG, GMS Hutter, Systema, Akros AG
Manufacturing:	Robert Bosch Automotive, Henkel CEE, UNITO Versand
Healthcare:	SVC, Vienna Health Insurance Fund (GKK)
Logistics & Transport:	DBH Logistics, Austrian Airlines, Transflow
Utilities:	EVN (electricity), SWM (electricity)

TOSCA Testsuite™

TRICENTIS' TOSCA Testsuite™ offers an integrated solution for the entire software test. It is unique in combining automated and manual tests in a single application. For the first time, manual test cases now provide a powerful basis for automation and can be automated without redundancies at the click of a mouse. Thus, TOSCA is the only solution on the market to achieve evolutionary or incremental test automation. TOSCA Testsuite™ provides holistic test management capabilities and merges all branches of software testing into one single application:

- Risk-based test management and test automation
- Test automation for GUIs (all standard technologies), CharBased Systems and

non-GUIs (wide variety of communication standards)

- Test case administration, versioning and reporting
- Manual and automated test execution management, logging and log archiving
- Integrated TestCase-Design workbench for methodologically sound test case identification
- Powerful AddIn concepts for the integration into existing ALM systems like requirements and defect management tools.

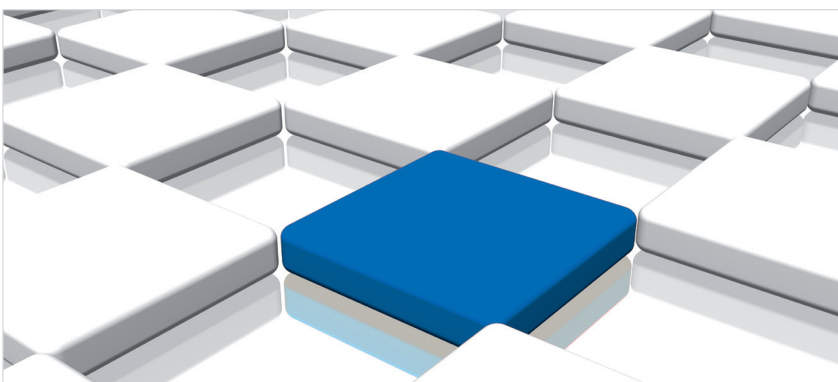

With the advent of TOSCA Commander™, TRICENTIS revolutionized the foundations of test automation in finally overcoming the common, entirely script-based and therefore programming intensive approach. TOSCA's Business Dynamic Steering marks the paradigm shift in automated software testing, separating the technical from the functional aspects. Thus, highly efficient test automation can be guaranteed with no programming required. Contrary to conventional framework solutions, TOSCA Commander™ also closes the gap to application steering, enabling testers to maintain all test cases in a purely business-based and non-technical way.

The benefit: the radical reduction of maintenance work massively increases the degree of automation, leading to an unprecedented leap in both productivity and return on investment.

Modern software systems provide a wide range of functionalities that are triggered by non-visual interfaces.

TOSCA accommodates this trend and also offers the simulation and analysis of a wide variety of communication standards, thus partially or entirely covering the complete functionality of your system with automated tests:

TOSCA makes it possible in a business-based way!

TOSCA Training

TRICENTIS offers functional and technical training courses both on customer site and in our offices. The content of our training courses will be tailored to our customers' requirements by our qualified trainers.

The packages we offer:

- TOSCA Certified User Foundation Level (TCUFL)
- TOSCA Certified User Advanced Level (TCUAL)
- TOSCA Certified Administrator (TCA)
- TOSCA Certified Quality Designer (TCQD)
- Technical Training Courses
