

SELF-PACED TRACK

Focus on how to professionally create and execute automated test cases for database applications in Tosca Testsuite.

OVERVIEW

This flexible training track is designed to be completely taken as self-paced learning.

It is especially suitable for individuals and groups who need to fit their Tosca learning around a busy schedule.

Learn through hands-on experience with these step by step exercises that guide you through a project from start to finish.

Master Tosca Testsuite by yourself with these on-demand resources at your fingertips!

TRAINING

This training is made up of one training module covering multiple topics and tasks related to automating database applications in Tosca Testsuite.

Once the seven exercises are completed*, you will be a certified Automation Specialist for Databases!

More information on the training modules can be found on page 2 of this data sheet.

** Online certification exam has been passed.*

SUMMARY

Upon completion of the training module you will be certified as an Automation Specialist for Databases.

What does this mean?

This means that you will be the go-to person, whose expertise will be required for database testing issues within your projects.

Skills that will be enhanced include Configuring a Data Source Name in ODBC Data Source Administrator, opening and closing database connections, using multiple database connections at the same time, verifying data in the database, using the Expert Module, and more!
