

## Introduction to the Exploratory Testing functions within Tricentis Tosca

### OVERVIEW

This online training is especially suitable for individuals and groups who need to fit their Tosca learning around a busy schedule.

Our training is comprised of numerous training resources, available when and where you need it. It includes exercises, case scenarios and much more.

Learn by example with step-by-step tutorials that guide you through new tasks from start to finish.

Master Tricentis Tosca by yourself with these on-demand resources at your fingertips!

### TRAINING

The training course consists of a brief theoretical introduction to Exploratory Testing. It is then followed by an in-depth journey through the features offered by the Exploratory Testing section within Tricentis Tosca

This course also details how to use the Standalone Exploratory Testing Agent to facilitate Exploratory Testing to business assets who do not have access to the full Tricentis Tosca installation.

Once these modules have been completed\*, you will earn a Tricentis certificate for Exploratory Testing Specialist!

More information on the training modules can be found on page 2 of this data sheet.

\* *Online certification exam has been passed. It is required to take and pass assessments after each lesson and a final exam.*

### SUMMARY

Exploratory Testing Specialist is an introduction to the Exploratory Testing Section in Tricentis Tosca as well as the Standalone Exploratory Testing Agent .

This course will teach how to set up and administrate and Exploratory Testing Session. Record Exploratory Testing Scenarios using Interactions or with a video. Edit the screenshots to enrich the recorded media and help the development teams to identify and resolve bugs. Raise Issues for problem areas found during the Scenario and create Reports, Manual tests and ExecutionLists.

By the end of the course you will have the understanding to organize and participate in an Exploratory Testing Session.
