

Wipro AssureNXT and Tricentis Tosca Deliver Automated Business Process Assurance

The Wipro AssureNXT/Tricentis Tosca integration generates end-to-end test suites with over 90% test automation rates. The solution eliminates the burden of manually creating, scripting, and maintaining business process tests. The resulting fully-automated regression tests are critical for reducing risk while accelerating the release of critical business functionality.

Wipro AssureNXT is Wipro's next generation managed services QA delivery framework. It integrates best-in-class tools, IPs, and best practices to address the needs of multi-speed enterprises implementing bi-modal IT. It ensures business applications' resiliency via highly-automated processes, QA analytics, and end-to-end collaboration.

Tricentis Tosca is a Continuous Testing platform that accelerates testing to keep pace with Agile and DevOps. With the industry's most innovative functional testing technologies, Tricentis Tosca breaks through the barriers experienced with conventional testing tools. Using Tricentis Tosca, enterprise teams automate tests across all layers of modern enterprise architectures—from the API, to web, mobile, and custom/packaged app UIs, to BI and data warehouses.

Tricentis Tosca

Wipro AssureNXT

"The AssureNXT/Tricentis integration delivers on the test automation promise. It produces and maintains a trusted test suite, allowing our organization to accelerate our release process."

-VP DevOps, Fortune 500 Bank
