Say Goodbye to Manual Screen Grabs and Tedious Documentation. Say Hello to qTest Explorer + Jira.

qTest Explorer is an innovative add-on to our Tricentis qTest platform designed specifically for agile testers giving your team a rich documentation tool that simplifies scripted and unscripted testing by intelligently capturing each mouse click, field change, page change and more.

1 Click 'Mozilla Firefox Start Page'

2 Click 'Search or enter address'

3 Type in 'Search or enter address'

4 Click 'Search or enter address'

5 Type in 'Search or enter address'

6 Type in 'Search or enter address'

7 Type in 'Search or enter address' 'www.autotrader.com'

8 Press Enter

Replace Cover

Send documentation directly to Jira Software

Exploratory Testing Recorder & Documentation Tool

Record Tests

Intelligent capture technology tracks all interactions from the testing session and automatically creates defect documentation.

Submit to Jira

Easily submit detailed defect documentation to Jira so you can quickly resolve issues.

Accelerate Test Automation

Reduce your test automation bottleneck by instantly turning a test session into an automated test script.

-  **Save Time**
You do the testing, and we'll handle the documentation
-  **Better Collaboration**
Provide your Jira dev teams with thorough steps to reproduce bugs found
-  **Explore More**
Go deeper into an application than ever before to find bugs and areas of improvement
-  **Streamline Submission**
Submit your session steps annotations into Jira as bugs or any other issue type
-  **Centralize Test Sessions**
Keep all your test documentation in one, centralized location for everyone to access
-  **Robust Documentation**
Generate highly detailed reports for auditing, training and compliance

Benefits for the Testers

- ✓ Write test cases faster
- ✓ Stay organized with less effort
- ✓ Store everything in one location
- ✓ Coordinate with other testers
- ✓ Dedicated tool for exploratory testing

Benefits for the Team

- ✓ Encourage collaboration and eliminate redundancy
- ✓ Align QA and UAT efforts
- ✓ Greater visibility into the testing process
- ✓ Generate reports that make insights easier
- ✓ Manage all session debriefs in one central location

Benefits Across an Organization

- ✓ Continuously improve testing process
- ✓ Minimize post production software defects
- ✓ Accelerate the testing life cycle
- ✓ Get better visibility across the software development lifecycle
