

The qTest platform provides Agile teams with a suite of software testing tools designed to improve speed, efficiency and collaboration throughout the software testing lifecycle.

OVERVIEW

This online training is suitable for individuals and groups who need to fit their test management learning around a busy schedule.

The training is comprised of numerous learning resources, available when and where you need it. It includes videos, exercises, case scenarios, solutions and much more.

Learn by example with step-by-step lesson videos that guide you through new tasks from start to finish.

Master the qTest platform by yourself with these on-demand resources at your fingertips!

TRAINING

The training course consists of seven integrated in-depth training modules covering qTest Manager and qTest Explorer.

These training modules are different in scope and length and are designed to be taken successively in a specified order to build up your knowledge of qTest Manager and qTest Explorer. Each lesson contains multiple challenging exercises for you to complete.

Once these seven modules have been completed*, you will earn a Tricentis Certificate for qTest Specialist Level 1!

More information on the training modules can be found on page 2 of this data sheet.

** It is required to complete all eight training modules and pass the final exam in order to earn the online certification.*

SUMMARY

qTest Specialist Level 1 is an introduction to the test management platform from Tricentis.

This course will teach you how to set up your own test project from start to finish, as well as efficiently track all your Test Cases, Requirements, Releases and Test Runs in a fast and organized way. This course will delve into how to create Releases and link Requirements, how to quickly update any modified Test Cases and test objectives, how to create Test Runs as well as manage results. Additionally, this course will teach you how to open our Explorer software to record sessions live and manage results in real time!

By the end of the course, you will have the understanding to organize and participate in qTest Management Testing.

DELIVERY METHOD

- ▶ Self-paced learning
- ▶ Learning material is provided online
- ▶ Instructor-led option available for this course

PACKAGE CONTENT

- ▶ 7 training modules incl. videos, exercises & solutions
- ▶ 1 training module covering complex use case
- ▶ 1 online final exam and certification

TARGET AUDIENCE

- ▶ Manual Testing Specialists who wish to manage their testing results
- ▶ Testers and Developers looking to learn how to use a tool for tracking test requirements within a release

SUITABILITY

- | | |
|---|---|
| <input checked="" type="checkbox"/> Test lead | <input checked="" type="checkbox"/> Manual Tester |
| <input checked="" type="checkbox"/> Test analyst | <input checked="" type="checkbox"/> Developer |
| <input checked="" type="checkbox"/> Test designer | <input checked="" type="checkbox"/> Test Manager |

PREREQUISITES

- ▶ General IT knowledge
- ▶ General QA testing knowledge

DURATION

- ▶ Approx. 8 hours of self-paced learning (average)

LANGUAGE

- ▶ Training materials are in English
- ▶ Certification exam is in English

ENROLLMENT

- ▶ Purchase course online directly from Tricentis Web Shop

The qTest platform provides Agile teams with a suite of software testing tools designed to improve speed, efficiency and collaboration throughout the software testing lifecycle.

COURSE MODULES

- 1. Test Plan: Releases and Builds**
 - ▶ How to create Releases and Builds
 - ▶ How to link Requirements to the Release scope for efficient tracking of test objectives

- 2. Requirements**
 - ▶ Create and link Requirements
 - ▶ Import Requirements from an ALM

- 3. Creating Test Cases**
 - ▶ Create Test Cases separately and from within Requirements
 - ▶ Add Test Steps in a Test Cases and call on Test Cases

- 4a. Creating and Using Parameters**
 - ▶ Basic functionalities of Parameters for saving time in Test Case creation
 - ▶ How to add values to Parameters and how to assign them to different Projects
 - ▶ Use Parameters in Test Cases

- 4b. Using Data Query**
 - ▶ Learn the functionalities of Data Queries for searching for Test Cases and reducing time
 - ▶ How to create Custom Queries, execute Queries and organize Queries in folders
 - ▶ How to modify Test Cases through a Query search

- 4c. Executing Test Runs and Submitting Defects**
 - ▶ Create Test Runs from Test Design section and execute Test Runs
 - ▶ How to submit Defects with and without an ALM integrated

- 5. Complex Scenario**
 - ▶ Demonstration of using all features and functionalities of qTest Manager for a more complex test project scenario

- 6. Setting up qTest Explorer (Web and Desktop)**
 - ▶ Download and install Explorer (web and Desktop version)

- 7. Using qTest Explorer (Web and Desktop)**
 - ▶ Record Sessions and how to use Explorer for Test Execution
