Test Analyst

Course Outcome

Upon completion of SAP Testing Specialist Level 1, you'll have a strong foundational knowledge of SAP test automation with Tricentis Tosca.

This course is the perfect first step to learn the skills required to carry out test automation for SAP applications using Tricentis Tosca. You will be able to identify required controls and steer the controls in automated test cases. You'll be able to create more complex test cases by using dynamic values as well as optimize your test cases for maintainability and reusability. You'll also learn how to use the Automation Recording Assistant to record test workflows and turn them into automated test cases.

Course Outline

Introduction to Tricentis Tosca and Model-Based Test Automation

Identifying and Steering SAP Controls

Creating and Structuring TestCases

Verifications

Use of Dynamic Values and ActionModes

Introduction to Requirements and Execution

Use of the Automation Recording Assistant
